

Project WET Workshop

CLIMATE CHANGE

and

CALIFORNIA WATER

Saturday Nov. 2, 2024

The California Department of Water Resources (DWR), Metropolitan Water District of Southern California, Municipal Water District of Orange County and the California Project WET program invite educators working with students in grades 6-12 to a special workshop on climate change and its impact on California's water resources.

Understanding climate change and its link to flood, drought, water quality, and more is crucial for all Californians. In this workshop, you will interact with DWR climate experts and engage in activities that will help your students understand the impacts of climate change on water and how to adapt to our changing environment.

Project WET activities are designed to engage students in the study of water through interactive simulations, use of models, and reality-based scenarios. The interdisciplinary activities supplement existing curriculum, are correlated to Common Core and Next Generation Science Standards, and provide strong foundations for STEAM, Project-Based, and Service-Learning programs.

For a \$20 registration fee, participants will receive a copy of the Project WET Climate, Water & Resilience guide, a continental breakfast and lunch, an opportunity to receive 0.8 CEU credit - and a \$100 stipend and return of your registration fee following completion of the workshop!

Saturday Nov. 2, 2024
(8:00 am to 4:00 pm)

Shipley Nature Center
17851 Goldenwest Street
Huntington Beach, CA 92647

Registration is limited to first 30 individuals to register. Additional registrants placed on a waiting

Registration closes
Friday, October 25, 2024
